## 5. TEACHING METHODOLOGIES (INCLUDING EVALUATION)

The methodology below is based, in general, in practical work by students, conducted in workplaces classroom, based on working documents provided by the teacher. Practical classes will be preceded by theoretical expositions on activities to develop. Tutorials with practical problem solving.

Continuous assessment results from the sum of the classification given to active participation in the classroom (20%), a mini-test (30%) and the press infographics project (50%).

Regarding the exam periods (Normal and Resource) students must present the paper, which will count 50% of the final grade, on one of the two days prior to the evaluation date (Exam or Appeal Exam). The remaining 50% will be related to a theoretical-practical test lasting two hours on the exam date.

## 6. COHERENCE BETWEEN TEACHING METHODOLOGIES AND OBJECTIVES

The teaching methodology of the course allows the student to apply throughout the semester in a practical way the content covered. Seeks to motivate students to active learning of theoretical and practical knowledge through practical exercises that value interdisciplinary.

## 7. ATTENDANCE

Not applicable.
